Consumer Grade

VS.

Industrial Grade

Why buy Industrial?

Pros and Cons

Why use industrial and commercial monitors instead of consumer grade TVs?

When looking to buy for a first time or to replace a flat panel display for your industry, you have probably been doing some research into all the brands, options and grades available in the general market today.

It is possible that you have gone on-line or even visited one of the local big-box electronic stores and marveled at the possibilities and low prices. And with price driving the majority of big decisions these days you may be tempted to buy the biggest screen at the lowest price during the weekend blow-out sale. After all, outside of violating the "not for commercial use" clause of the warranty agreement, what is the real harm in putting a consumer grade LCD in your industry?

We urge you to read this article before making any big decisions that could cost you big in the short and long term ...
