For Immediate Release

DYNICS Announces New Software Partnership with ACP ThinManager

DYNICS is pleased to announce a new partnership with ACP ThinManager. With ACP enabled DYNICS industrial PCs customers now have a powerful new Thin Client solution. A wide range of DYNICS PC options include the small MINI Series PCs and integrated workstations from 8" to 80".

Ed Gatt, President, says, "This partnership allows for ease of deployment of visual assets throughout the plant floor with reduced implementation costs. With high quality, durable industrial PCs and displays from DYNICS, and ThinManager's centralized factory management, customers can visualize plant performance and increase uptime."

DYNICS brings cutting edge industrial and interactive products right to the customer's doors with our state-of-the-art Demo Trailer. Among the lineup of industrial PCs and displays, ThinManager enabled PCs are also available for demonstration. Call now to schedule the DYNICS Demo Trailer at your location!

DYNICS products are proudly made in America, and include Industrial PCs, Integrated Workstations, 8" to 80" Displays, Touchscreen Kiosks, Hybrid PC/Display Units, Multi-gesture Compatible and more...
